Professional Summary

Full-Stack MERN Developer with expertise in designing, developing, and deploying modern, scalable, and responsive web applications. Proficient in JavaScript, React.js, Node.js, Express.js, MongoDB, Firebase, Redux, and Tailwind CSS, with strong experience in building RESTful APIs, authentication systems, and database-driven applications.

Skilled in developing secure and high-performance solutions using JWT authentication, role-based access control, password encryption, cloud storage integration, file uploads, and image optimization techniques. Experienced in implementing complete CRUD functionality, API integration, state management, internationalization (i18next), form validation, and responsive user interfaces using modern frontend frameworks and component libraries.

Strong understanding of software development best practices, including clean code architecture, API design, error handling, environment management, performance optimization, and cross-browser compatibility. Passionate about solving complex technical challenges, delivering user-centric solutions, and collaborating with global teams to build reliable and scalable digital products.
